APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion of the waters of an underground source as heretofore granted under Permit 49258, Certificate 14488, is issued subject to the terms and conditions imposed in said Permit 49258, Certificate 14488, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The issuance of Permit 67202 expires Temporary Permit 67033-T.

If any water under this permit is cancelled, withdrawn, or any water is not put to beneficial use, it will revert to the groundwater source and not back to the base water right.

The total combined duty of water under Permits 65724, 67034, 67202, 67203, and 67204, and any waters of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 2,631.0 acre-feet per year for the irrigation of 657.75 acres. The permittee is responsible for insuring delivery of the entitled decreed and storage waters that are supplemental to these permits. In any year that the Walker River Irrigation District declares a full allocation of decreed waters to the priority years of C-125 claims supplemental to these permits, underground water shall not be pumped from the wells described in these permits. In any year that the Walker River Irrigation District has no decreed or storage water, or declares a reduced allocation of surface waters to the priority years of C-125 claims supplemental to these permits, then the place of use of the permits can be irrigated with underground water, but not to exceed a duty of 4 acre-feet per acre per year from the total of decreed, storage, and underground waters.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 3.2765 cubic feet per second, but not to exceed 1,217.41 acre-feet annually, and not to exceed a yearly duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

May 16, 2003

Proof of completion of work shall be filed before:

June 16, 2003

Water must be placed to beneficial use on or before:

May 16, 2004

Proof of the application of water to beneficial use shall be filed on or before:

June 16, 2004

Map in support of proof of beneficial use shall be filed on or before:

June 16, 2004

Item 15. Remarks:

The well under Permit 49258 is being redrilled and also being kept as part of the overall irrigation system. This application is to provide a permanent water right for the redrill of the existing well, which is currently being permitted under Temporary Permit 67033T. The water under this application is to be supplemental to water under Permit 65724, Application 67034, and applications (being filed concurrently) to change Permits 53913 and 56856, for irrigation of 657.75 acres (currently reduced to 589 acres for approximately 2 years, as referenced in Permit 66891T). Use proof of beneficial use map on file under Permit 45856 to support the existing point of diversion and the existing and proposed place of use.

This application proposes to change all of the water rights issued under Certificate 14488. Permit 60556 was issued on May 16, 1996, thereby abrogating a portion of base Permit 49258, before Certificate 14488 was issued.
